

Your child can sort words into categories (e.g., colors, clothing) to gain a sense of the concepts the categories represent.

- Understand that words can be grouped together based on different attributes.

HELP AT HOME

- ▶ Write several words on index cards that fit into 2-3 categories (e.g., animals, food, colors). Have your child sort the cards into their correct categories.
- ▶ Use pictures cut from a magazine and have your child sort the pictures into different categories. Have your child discuss what their "rule" was when sorting the pictures.
